How to Install
A Replacement Computer

1. Make sure the original computer is powered off before unplugging it.
2. After unplugging the computer, unplug the various cords (i.e., barcode scanner, credit card reader, etc).
3. Plug the new computer in and power it on.
4. Reconnect all the cords that were connected to the original.
5. Call customer support to register the kiosk to your store!
